

## Digital printing requirements

**In order to be able to process your print job as quickly as possible, there are a few points to consider when preparing and transferring data!**

### Software

Please use **suitable DTP software** for data creation (e.g. Adobe Illustrator, Photoshop or InDesign). Office programs like Word or PowerPoint are **NOT** suitable for creating high-quality print data!

### File formats

**Print-ready PDFs** must be provided for order processing! (at least PDF/X-7:2008)

Open data and EPS files will NOT be accepted (there are not considered ready for printing).

The organisational costs arising from the transmission of incorrect or non-print-ready data will be invoiced at list price according to actual expenditure.

### File names

Please choose short, **clear names** (without special characters) that can be assigned to the order and the desired application. If a graphic plan is transmitted by the AMB, the associated **number** must have the letter "**G**" integrated into the designation.

### Data delivery

**By mail:** up to a size of 9,9MB or by data link **by WeTransfer** etc.

### Document contents

Fonts and **texts must be converted into paths, logos vectorised** and images embedded.

### Colours, bleeds and resolution

**Print exclusively in CMYK colour space.**

**Overfill (bleed): at least 20mm** all around at 1:1 (or 2mm all around at 1:10)

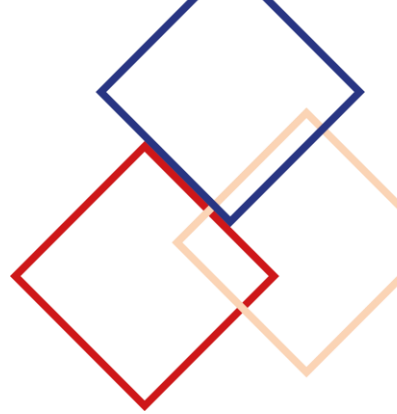

**Resolution: at least 100dpi** at 1:1 (or 1.000dpi at 1:10)

**Scale: 1:1 / 1:2 / 1:4 / 1:10**

**Contours:** Print data with RGB or special colours (HKS, Pantone, RAL, etc.) cannot be printed in large format printers. These are therefore automatically converted to CMYK.

**Important information:** All prices quoted are only valid if print-ready data is provided in accordance with the above requirements. Necessary subsequent print data preparation, as well as the exchange of already received subjects will be charged according to actual expenditure and cannot be guaranteed at any time. Please note that any necessary adaptation and organisational work up to a cost of EUR 75,- will be carried out without additional customer information. Successful adaptation or production cannot be guaranteed at any time if incorrect or non-print-ready data is transmitted.

Please note the **graphics deadline**, which you will find under "Important information".  
This must be adhered to in order to guarantee on-time delivery!
